One of the best Minigames I played in years.. One of the best Minigames I played in years.. I really enjoyed playing this game!  
some levels can be quite difficult but still fun. As a fan of Gun Rocket I definitely wanted to try this game and can say I didn't

---

regret finishing it the first time. While starting a New Game+ I was positively surprised by some of the ideas implemented to make the levels a lot harder. I kept playing till I got stuck here: <http://steamcommunity.com/sharedfiles/filedetails/?id=918808473> I tried and tried, but had to contact the developer. He decided to change the level and I finally got an update: <http://steamcommunity.com/sharedfiles/filedetails/?id=960265412> I was still excited and continued playing past the 1st boss in New Game+. At a certain moment - while at this level 'Detour' - I came to the conclusion that the game wasn't a fun experience anymore; there was just too little room for error (again), and with that in mind, you were forced to move very slowly a lot of the time. Not a problem in case of a short level experience, but that wasn't the case a lot of the time. That aside, it's not possible to move backwards nor use a 'handbrake' or similar to completely park the triangle/rocket, making it only harder (especially with your 'Luv', where you sometimes need 4 eyes); not only unforgiven, also unfair I had to conclude, partially caused by slowness = annoyance. Checkpoints are recommended in some levels, but there are none. A few recommendations for an update: - 'Reverse gear' = moving backwards; only being able to make turns and rotate, often means dying through 1/3 edges of the triangle, because there's little room for error (in New Game+); - The possibility to completely park the triangle, not moving a pixel; - Level tests in New Game+.the progression in difficulty didn't always make sense, caused by a time limit, gravity (%) or fuel limitations ; - Level screen! Could have motivated me to continue or maybe I could have skipped a few levels first, if that would have been an option. I didn't have any insight regarding my progress, I could only find some numbers in the game data. That being said, I can actually still recommend playing this game, because there's enough fun before you start a New Game+ - which I don't expect everyone to start anyway. I just have mixed feelings about the New Game+ Mode and actually regret having started it.I could eventually finish it, but when something's not entertaining anymore, it's better to stop. I left the game with a bad taste in my mouth. 7/10 - If you like Gun Rocket and are good at it, definitely try this, but think twice prior starting a playthrough in New Game+.. Want a challenge? This is your game. I have played it through the first handful of levels and it is already a challenge, the gameplay is so simple yet so difficult at the same time. In my opinion, the game as of right now is well worth the \$2.99, especially when compared to other games on steam that are at a similar price point. It even has a little replay value and as of right now 45 levels, possibly even more in the future to keep you entertained for at least a few hours or more. Here is a video of gameplay including the first 10 levels give or take: <https://www.youtube.com/watch?v=cmX8YDIGEg>. I really enjoyed playing this game! some levels can be quite difficult but still fun.
